English (15 Marks)

Q.1 Read the passage carefully and answer the questions that follow: 4

Scientists know many things about the Sun. They know how old it is. The Sun is more than 4.5 billions years old. They also know the Sun's size. The sun may seem small, but that is because it is so far away. It is about 93 million miles (150 million kilometers) away from that Earth. The Sun is so large that the diameter of Sun is 109 times the Earth's diameter. The Sun also weighs as much as 333,000 Earths. The Sun is the centre of our solar system. Beside the Sun the Solar System is made up of the planets, moons, asteroid belt, comets meteors and other objects.

1. How old is the Sun ?

Ans: _____.
