**Read the passage given below:**

1. I was the last child of a small-time government servant, in a family of five brothers. My very earliest memory of my father is as that of a district employment officer in Koraput, Orissa. It was and remains as back of beyond as you can imagine. There was no electricity; no primary school nearby and water did not flow out of a tap. As a result, I did not go to school until the age of eight; I was home-schooled.

2. My father used to get transferred every year. The family belongings fit into the back of a jeep, so the family moved from place to place; without any trouble, my mother would set up an establishment and get us going. Raised by a widow who had come as refugee from the then East Bengal, she was matriculate when she married my father. My parents set the foundation of my life and the value system which makes me what I am today and largely defines what success means to me.

3. My father had been given a jeep by the government. There was no garage in the office, so the jeep was parked in our house. My father refused to use it to commute to the office. He told us that the jeep was an expensive resource given by the government; it was not 'his jeep' but the government's. Insisting that he would use it only to tour the interiors, he would walk to his office on normal days. He also made sure that we sat in the jeep only when it was stationary. That was our early childhood lesson in governance, a lesson that corporate managers learn the hard way. Indeed, some never do.

	<p>4. The jeep's driver was treated with respect like any other member of my father's office. As small children, we were taught not to call him by his name. We had to use the suffix 'dada' whenever we were to refer to him in public or in private. When I grew up to own a car, a driver by the name of Raju was appointed.</p> <p>I repeated the lesson to my two small daughters. They have, as a result, grown up to call Raju, 'Raju Uncle'—very different from many of their friends who refer to their family drivers as 'my driver'. When I hear that term from a school or college-going person, I cringe. To me, the lesson was significant: You treat small people with more respect than big people. It is more important to respect your subordinates than your superiors.</p>

<b>Read the passage given below:</b>		
<p>The epidemic of drug abuse in young generation has assumed alarming dimensions in India. Changing cultural values, increasing economic stress and dwindling supportive bonds are leading to initiation of drug abuse.</p> <p>Drug addiction causes immense human distress and the illegal production and distribution of drugs have spawned crime and violence worldwide. June 26 is celebrated as international day against Drug Abuse. It is an exercise undertaken by the world community to sensitize the people in general and the youth in particular to the menace of drugs.</p> <p>The pattern of drug abuse in India has under gone changes over the years. Use of drugs like charas, ganja, and opium was a tradition in some places of India, where they were mainly used for ritualistic purposes.</p> <p>According to a UN report, one million heroin addicts are registered in India, and unofficially there are as many as five million. Inhalation of heroin alone has given way to intravenous drug use that too in combination with other sedatives and painkillers. This has increased the intensity of the effect, hastened the process of addiction and complicated the process of recovery. A large number of people commit suicide due to drug/ alcohol/addiction. Drug abuse is a complex phenomenon, which has various social, cultural, biological, geographical, historical and economic aspects.</p> <p>The disintegration of the old joint family system, absence of parental love and care in modern families where both parents are working, decline of old religious and moral values etc. lead to a rise in the number of drug addicts who take drugs to escape hard realities of life.</p> <p>Drug abuse is primarily due to the nature of the drug abused, the personality of the individual and the addict's immediate environment. The processes of industrialisation, urbanisation and migration have led to loosening of the traditional methods of social control rendering individual vulnerable to the stresses and strains</p>		

of modern life. Drug abuse caused a detrimental impact on the society. It has led to increase in the crime rate. According to the World Health Organisation report 2002, 8.9% of the total burden of disease is due to use of psychoactive substances. Adolescent drug abuse is one of the major areas of concern in adolescent and young people's behaviour. It is estimated that in India, by the time most boys reach ninth grade, about 40% of them have tried at least one of the substances of abusive nature.
